

Straight from the shrub

This is a simple and quick possibility to provide solitary wild bees with a nesting aid. In order to make sure that they accept it, it is important to fix the stems in an upright position.

Material:

Material	Quantity	Measurements	
Stems	20	Different lengths: preferably blackberry, elder, teasel or thistle	✓
Wire			

Construction:

Before you start, please read the general construction and maintenance rules on our website and keep them in mind.

1. Ensure that there is free access to the core.
2. Fix the stems vertical and one by one with wire onto the fence.
