

Hoverfly-lagoon

Building-level: Easy

Material:

- Container of your choice, e.g. a bucket (preferably 20 cm high)
- Leaves
- Sticks, bamboo, shoots or the like (longer than the depth of the container)
- Saucer with a significantly larger diameter than the bucket
- Pieces of wood / wood shavings

Building:

1. Fill the container with leaves, approximate $\frac{1}{4}$ of the container
2. Place sticks or bamboo in the container (it is important that the sticks protrude over the edge of the container)
3. Fill the container with water
4. Place the container on the saucer
5. Put leaves and pieces of wood on the saucer to surround the container
6. Choose a sunny and quiet place for your hoverfly-lagoon
7. Now enjoy!
